

5S Solutions & Management

We Implement Change
Capability Statement

CONTENTS

WHO WE ARE

We are a Perth based, and unique to Australia, 5S consulting company specialising in, but not limited to, maintenance workshops in mining environments. We incorporate the 5S methodology and principles into transforming the layout, flow and efficiency of the workshop.

OUR MISSION

Our mission is to replace the chaos with a system that provides speed and efficiency. Maintenance is in our blood, and we take pride in taking tired, run down and unorganized workshops and transforming them into vibrant, efficient, safe and organized spaces where people enjoy working.

WHAT WE DO:

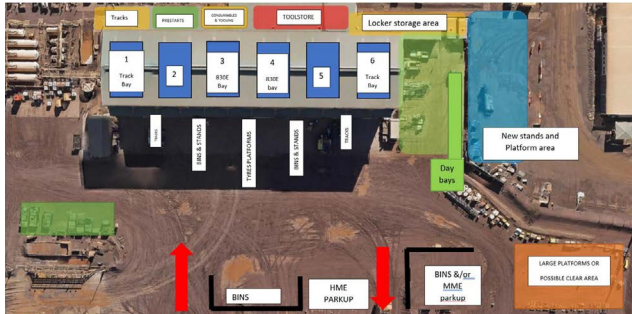

We assess the workplace, speak with stakeholders and using innovative new ideas, purpose-built tooling, 5S methodology and technology. We implement a system improving production, safety, reduce downtime and waste, increase availability, and ultimately maximise profits.

SERVICES

WORKSHOP EFFICIENCY CONSULTANCY

Is the original layout of the workshop applicable and fit for purpose now? Are you maximizing the space? A workshop consultation will provide solutions that will organize and improve production in the workplace.

PROJECT MANAGEMENT

We have the skills, contacts and knowledge to manage projects that you would like to Implement.

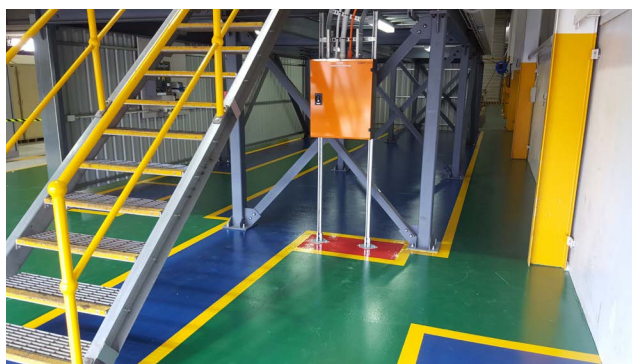

-  PARTS COMPOUND
-  STORAGE SOLUTIONS
-  DESIGNATED EQUIPMENT AREAS
-  GAS STORAGE
-  HOSE SHED UPGRADES

SPECIALISED WORKSHOP EQUIPMENT & TOOLING DESIGN PROCUREMENT

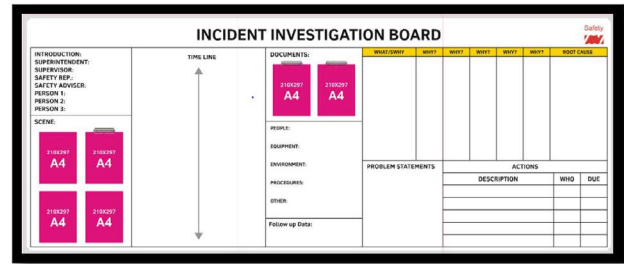

We can design specialised equipment improving safety and efficiency.

WORKSHOP REJUVENATION

PROCESS IMPROVEMENT

5S DEVELOPMENT AND IMPLEMENTATION

A place for everything, and everything in its place. Specialised and customised design solutions to keep the workplace clean and tidy.

5S TECHNOLOGY APP

Now that you have gone to the trouble of 5S'ing the workshop, you have to sustain it. The final "S" can often be the most challenging, but we have the solution. We currently have under development an app that will take care of this for you.

Inspection & conformance monitoring

New tooling slide show

Asset register

5S INSPECTION & CONFORMANCE MONITORING:

Using an app on your phone, you can walk up to an area and it will:

- ✓ Show you a picture of how the area should look
- ✓ Allow you to take a picture of how it currently looks
- ✓ Allow you to make notes for improvement
- ✓ Allow you to instantly email your findings to the relevant parties, i.e. supervisors, safety rep, engineering, TA, coordinators etc.

Benefits: Forces people to walk around to the different locations - no more ticks and flicks. Significant time saving by instantly emailing.

NEW TOOLING SLIDESHOW

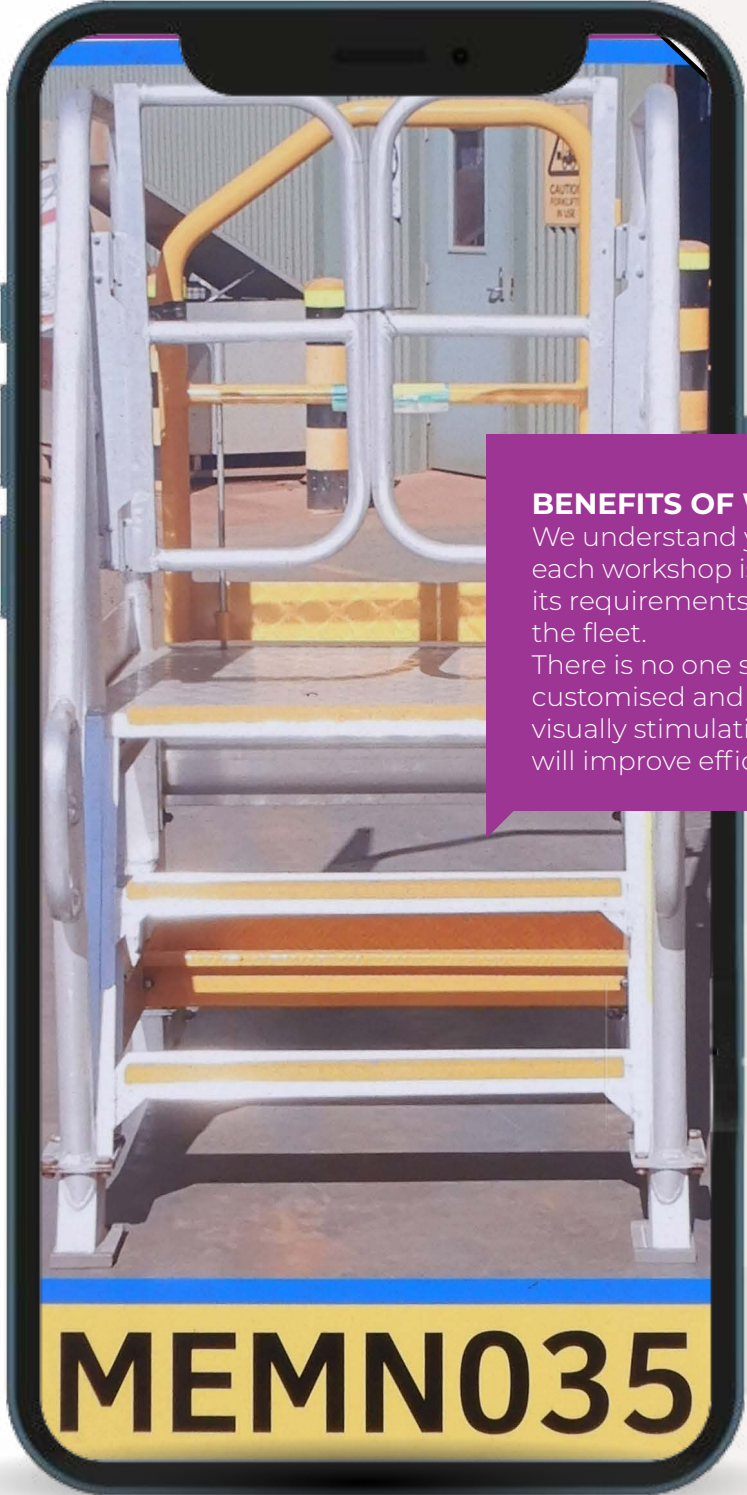

You can take pictures of new tooling, recent projects, workshop achievements / initiatives and add text to create a slideshow that you can put on a TV screen for information sharing at the toolstore, educating personnel while they wait.

Benefits: No more new (expensive) tooling sitting unused on the shelf because people don't know it exists. Provides education to new and existing personnel on new purchases. Improves moral as personnel can see the changes being made in the workshop.

ASSET REGISTER MONITORING

Take pictures of the asset, input asset numbers, add technical drawing, quotes, vendor contacts and now you have a register that can monitor, track and replace all your assets.

Benefits: Allows your assets to be placed on a register allowing you to track and log your assets.

BENEFITS OF WORKING WITH US:

We understand your environment. We understand how each workshop is different, how dynamic it is and how its requirements change depending on the life cycle of the fleet. There is no one size fits all plan, and we can offer customised and unique solutions to help you get the visually stimulating and well-organised workplace that will improve efficiency and moral.

Process Improvement

Improve Workplace Efficiency

Improve Employee Morale
